*CD: "Helicopters, Drill Sergeants and Consultants"

*CD: "Keeping Cool When Parenting Heats Up"

What is Love & Logic for parents?

Many parenting philosophies center around making sure kids are comfortable and feeling good about themselves in order to achieve a good self-concept. However, the 75-years of combined experience shared by the founders of Love & Logic show that self-confidence is achieved through struggle and achievement, not through someone telling you that you are number one. Self-confidence is not developed when kids are robbed of the opportunity to discover that they can solve their own problems with caring adult guidance. The award-winning Love & Logic philosophy is an approach to raising kids in a way that provides support from loving parents while at the same time expecting kids to be respectful and responsible.
